DCS OPERATION & ENGINEERING (CENTUM CS3000)

COURSE CONTENT

- Overview about DCS Yokogawa
- Describe hardware: Field Control Station (FCS) and Human Interface Station (HIS)
- Human Interface Station (HIS)
- General components definition
- Hardware configuration: HIS & ENG Station, FCS, I/O address
- Design graphic: create and repair Drawing
- Fundamental control functions
- Sequence Control
- Control Function and Monitoring
- Engineering Laboratory
- Define User function
- Test Function

OBJECTIVE

- This course aim is to provide overview knowledge of hardware configuration, software CS3000, operate as well as how to engineer DCS Yokogawa
- Participants achieve operation procedure via automatic simulator DCS Centum CS3000

TARGET GROUP

This course is designed to train individuals who are DCS operators, designer as well as those are equipped knowledge of process control and automatic instrumentation.

DURATION

5 days
